

## Plesk Onyx Licensing Guide

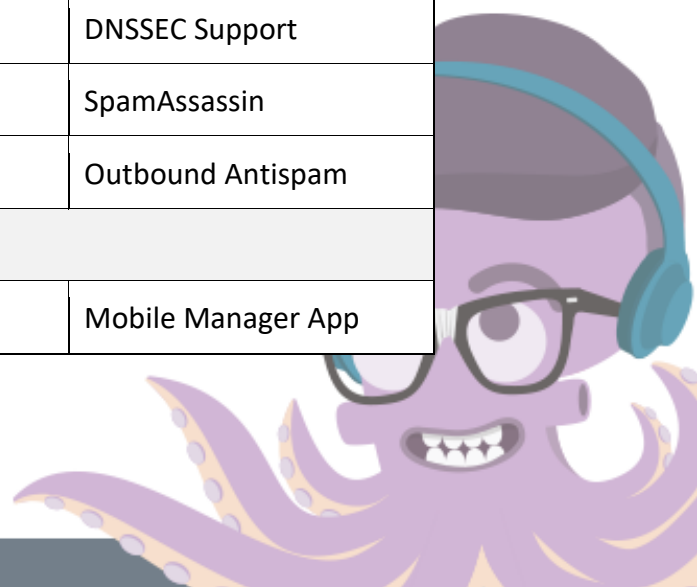

Plesk is utilizing a license model that is simple, powerful and flexible. The licensing of Plesk consists of multiple elements and options:

- 1) Server based licenses – e.g. Plesk licenses
  - a. Installation on dedicated servers (also known as physical servers)
  - b. Installations on virtual servers (also known as virtual private servers or VPS)
- 2) All our licenses can be purchased on a monthly or annual base or in discounted bundles. These licenses can be terminated at any time and renew fully automatically through Plesk's licensing servers.
- 3) All our server based licenses provide a huge number of core features, divided into 3 Editions:
  - a. **Plesk Web Admin Edition** for Web Admins (or IT Admins), who manage sites for an employer, a business, or for themselves. If you need simple website and domain management without all of the service provider overhead, like management of customers, resellers or subscriptions, this is the perfect choice.
  - b. **Plesk Web Pro Edition** for Web Professionals, who design, develop, and deploy websites and web applications. You need a simple way to manage your customers' websites and applications, including your growing use of WordPress as a CMS platform in a fully managed model for your customers.
  - c. **Plesk Web Host Edition** for Agencies or Web Hosters with all hosting features. You allow your customers to use your shared accounts in almost any configuration you want. You want secure WordPress and domain management tools to support your multi-tenant, "install anything" customers. In addition, the Web Host Edition offers advanced reseller management.

Full breakdown of the available features per edition:

Web Admin Edition	Web Pro Edition	Web Host Edition
Plesk Core Features		
10 domains	30 domains	Unlimited domains
		Reseller management
	Subscription management	Subscription management

### Plesk Onyx – Licensing on Hyperscalers

Plesk can be purchased as a software license from our website on [www.plesk.com/pricing](http://www.plesk.com/pricing) . In addition, Plesk is offered on major hyperscale cloud providers, such as Amazon Web Services (AWS) or Microsoft Azure Marketplaces.

On both, AWS and Azure, there are 2 options available to get Plesk, combined with a pre-installed server that is ready to use:

- 1) **Hourly licenses:** in that case, Plesk can be purchased in a combination with any kind of server available on AWS and Azure, **where the license is built into the server image** itself. Available in options as small as one hour.
- 2) **BYOL (Bring your own license):** In addition to the hourly licenses where the license is built into the server image itself, we also offer so-called BYOL license on these offerings. That means that the server image **does NOT include a license for Plesk itself** once installed. That enables you to use any Plesk license that you may have purchased elsewhere or that you purchased on our store on [www.plesk.com/pricing](http://www.plesk.com/pricing)

Note: both options have no difference in terms of pricing compared to our retail pricing, unless you buy servers with more than 4 CPUs. For such servers, additional license charges may apply.

## Plesk Onyx – Additional Features, Feature Packs and Extensions

More than just a control panel! If you think this is just a fluffy marketing term, think again. Plesk Onyx does not only provide with a compelling set of brand new and cool features but is also beginning its transformation from basic hosting control panel to a cloud ready platform addressing multiple use case scenarios.

We strongly believe that a future-proof and cloud savvy solution will have to provide you with a broad feature set in order to deliver what customers want today and will need in the near future. A one-size-fits-all product based approach is not an option anymore because of complexity, disk space consumption and manageability. Plesk Onyx is therefore providing you with a lightweight core combined with a fast growing tool box called the Plesk extensions catalogue.

This compelling ecosystem comprises of three major categories:

1. **Additional features developed by Plesk**

Plesk offers many additional features that can be purchased as an option. These include additional language packs or premium options such as cGroups.

2. **Feature packs**

We make it easy for you to do business with us! One single SKU and attractive discounts are the main reasons why you would want to buy a compelling bundle rather than single extensions.

3. **Free extensions**

Everything you know and love about previous Plesk versions is still available. Some of the features you might be looking for have been moved from the core to the extensions catalogue and are waiting to be installed at no extra cost. However, there is more than you might think so don't wait and have a look.

4. **Commercial extensions**

This is your chance to tailor Plesk to your customer's needs, add value to your standard IaaS offerings, differentiate yourself from your nearest competitor

and generate additional revenues. Whether you'd like to add a tool for social media management, e-Commerce or enhanced security. Just pick and choose from the Plesk extensions catalogue and make your customers happy with a targeted solution addressing their most pressing pain points.

Note: most of these features and extensions (if not free), **are also licensed per server**. With certain exceptions that offer per server licenses with additional packs inside, such as: a number of domains or mailboxes or even pay as you grow across multiple servers.

### Available Plesk Feature Packs

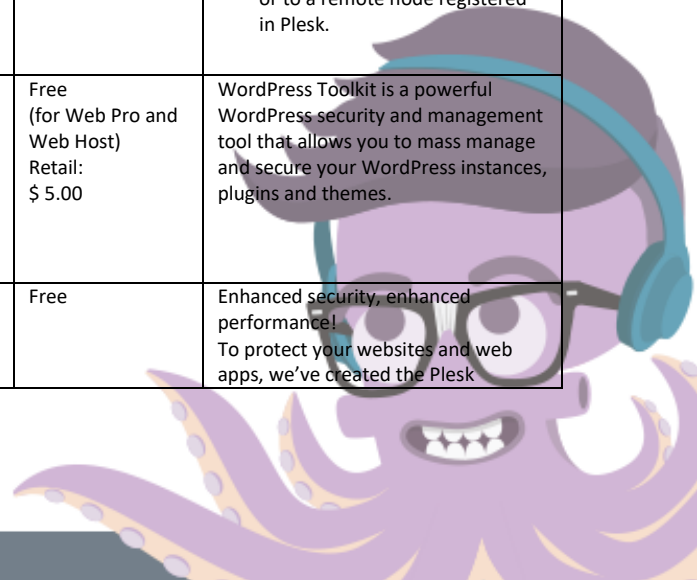

Extension	Features	Category	Price (per month)	Description
 <p><b>Power Pack</b></p>	<ul style="list-style-type: none"> <li>• KAV Kaspersky Antivirus (5 Mailboxes)</li> <li>• Tomcat</li> <li>• MSSQL (Windows only)</li> <li>• PostgreSQL (Linux only)</li> <li>• Web Presence Builder (10 sites)</li> </ul> <p>NEW:</p> <ul style="list-style-type: none"> <li>• Docker Remote support (\$ 5 value)</li> <li>• DNSSEC</li> <li>• WordPress Toolkit (\$ 5 value)</li> <li>• Smarter Mail Remote Control (Windows only)</li> </ul>	Our new Power Pack 2.0	Dedicated \$ 14.99 VPS \$ 6.25	Our well known Power Pack with new features and functions.

## Plesk Extensions developed by Plesk

Extension	Features	Category	Price (per month)	Description
<p><b>Multi Server</b></p> 	<ul style="list-style-type: none"> <li>• Multi server support for distributed virtual environments</li> </ul>	<p>Server management</p>	<p>Retail: \$ 10.00</p>	<p>Plesk Multi Server allows you to manage multiple Plesk instances from a single Plesk server.</p>
<p><b>DNSSEC</b></p> 	<ul style="list-style-type: none"> <li>• Signing DNS data to secure the domain name resolving process</li> </ul>	<p>Security: DNS</p>	<p>Free included (for Web Pro and Web Host)</p> <p>Retail: \$ 5.00</p>	<p>This extension enables you to protect DNS data with Domain Name System Security Extensions. Due to BIND version requirements, the extension works only on the following OSes: Debian 8, Ubuntu 14.04, Ubuntu 16.04, CentOS 7, RHEL 7 and CloudLinux 7.</p>
<p><b>Docker Remote</b></p> 	<ul style="list-style-type: none"> <li>• Install Docker containers to a remote node registered in Plesk</li> </ul>	<p>Server management</p>	<p>Retail: \$ 5.00</p>	<p>To help you meet the evolving requirements of your customers, Plesk Onyx comes with Docker support. Here is what you can do with it:</p> <ul style="list-style-type: none"> <li>• Have on-demand access to a wide range of modern technologies, such as Redis, MongoDB, Memcached, and many more.</li> <li>• Choose from a catalog of available images, or upload a custom image.</li> <li>• Deploy and manage Docker containers straight from the Plesk interface.</li> <li>• Install Docker containers locally, or to a remote node registered in Plesk.</li> </ul>
<p><b>WordPress Toolkit</b></p> 	<ul style="list-style-type: none"> <li>• Automatically secure, update and deploy multiple WP instances with one click</li> </ul>	<p>Web development CMS</p>	<p>Free (for Web Pro and Web Host)</p> <p>Retail: \$ 5.00</p>	<p>WordPress Toolkit is a powerful WordPress security and management tool that allows you to mass manage and secure your WordPress instances, plugins and themes.</p>
<p><b>Security Advisor</b></p>	<ul style="list-style-type: none"> <li>• One-click SSL</li> <li>• One-click HTTP/2</li> <li>• HTTPS for WordPress</li> </ul>	<p>Security</p>	<p>Free</p>	<p>Enhanced security, enhanced performance! To protect your websites and web apps, we've created the Plesk</p>

	<ul style="list-style-type: none"> <li>Centralized security management</li> </ul>			<p>Security Advisor for you – a simple extension for Plesk that allows you to secure all your websites with SSL at one single click. Additionally, this extension lets you activate HTTP/2 for more performance on all your sites.</p>
<p><b>Let's encrypt</b></p> 	<ul style="list-style-type: none"> <li>Create a free SSL certificate for your domain</li> </ul>	<p>Security: DNS</p>	<p>Free</p>	<p>Let's Encrypt is a certificate authority (CA) that allows you to create a free SSL certificate for your domain.</p>
<p><b>Git 1.0</b></p> 	<ul style="list-style-type: none"> <li>Deploy your sites and web apps in Plesk from your local or remote git repositories</li> <li>Integration with GitHub and Bitbucket is also available.</li> </ul>	<p>Site management</p>	<p>Free</p>	<p>Deploy your sites and web apps in Plesk from your local or remote git repositories. Integration with GitHub and Bitbucket is also available.</p>
<p><b>Plesk migrator</b></p> 	<ul style="list-style-type: none"> <li>Transfer data to Plesk from other hosting platforms</li> </ul>	<p>Site migration</p>	<p>Free</p>	<p>Transfer data to Plesk from other hosting platforms.</p>
<p><b>Plesk events in slack</b></p> 	<ul style="list-style-type: none"> <li>Forward Plesk event notifications to any channel in your Slack team</li> </ul>	<p>Project management</p>	<p>Free</p>	<p>Forward Plesk event notifications to any channel in your Slack team.</p>
<p><b>Ruby 1.2</b></p> 	<ul style="list-style-type: none"> <li>The Ruby extension allows users to quickly and easily deploy Ruby apps on their domains</li> <li>Both Ruby on Rails and Sinatra frameworks are supported</li> </ul>	<p>Development</p>	<p>Free</p>	<p>The Ruby extension allows users to quickly and easily deploy Ruby apps on their domains. Both Ruby on Rails and Sinatra frameworks are supported. Note: it is strongly suggested to install the "Tools required for building Ruby gems" component in order to facilitate quick and painless Ruby gem installation.</p>
<p><b>Node.js 1.2</b></p> 	<ul style="list-style-type: none"> <li>The extension enables you to deploy Node.js apps, start/stop/restart them, install NPM packages, edit config files and more.</li> </ul>	<p>Development</p>	<p>Free</p>	<p>Node.js is an open-source, cross-platform runtime environment for developing server-side Web applications written in JavaScript. The extension enables you to deploy Node.js apps, start/stop/restart them, install NPM packages, edit config files and more.</p>

### 3<sup>rd</sup> party premium Extensions

Extension	• Features	Category	Price (per month)	Description
	<ul style="list-style-type: none"> <li>• ServerShield plus advanced</li> <li>• CDN content delivery network</li> <li>• Detailed features: <a href="https://www.plesk.com/extensions/servershield/">https://www.plesk.com/extensions/servershield/</a></li> </ul>	Security / Performance	Retail: \$ 18.90	ServerShield by CloudFlare defends all your websites against online threats while making them load lightning fast.
	<ul style="list-style-type: none"> <li>• Server OS, no extension</li> <li>• CloudLinux OS is a recommended alternative OS to use on your Plesk servers</li> <li>• Available for Web Pro and Web Host edition (Cloudlinux included)</li> </ul>	Server OS	Consult partner pricelist for latest pricing	CloudLinux OS is the leading platform for multitenancy. It improves server stability, density, and security by isolating each tenant and giving them allocated server resources. This creates an environment that feels more like a virtual server than a shared hosting account. By doing so, CloudLinux OS reduces operating costs and churn rates, and increases profitability.
	<ul style="list-style-type: none"> <li>• Automated kernel security updates without reboots</li> <li>• Free version available (still needs server reboots)</li> <li>• Paid version without the need to reboot your server</li> <li>• Details: <a href="https://www.plesk.com/extensions/kernelcare/">https://www.plesk.com/extensions/kernelcare/</a></li> </ul>	Security: Server	Retail: \$ 3.95	The easy, rebootless install with a single line of code will ensure you never miss another kernel security patch. Supports most popular Linux distributions.
	<ul style="list-style-type: none"> <li>• Premium antivirus by Dr. Web</li> <li>• 2 licenses available, 1 Linux, 1 Windows (same pricing)</li> </ul>	Security: Email	Retail: Dedicated \$ 29.99 VPS \$ 7.49	Dr. Web is an award winning virus scanning and filtering software.
	<ul style="list-style-type: none"> <li>• MagicSpam is our Premium Antispam offering serverwide antispam for your server with zero touch.</li> <li>• This extension is for Linux only.</li> </ul>	Security: Email Antispam	Retail: \$ 10.00	Spam protection in the SMTP layer, no need to change DNS or MX records. Edge level protection that protects unlimited users, unlimited domains and allows users complete logging, statistics and custom controls.

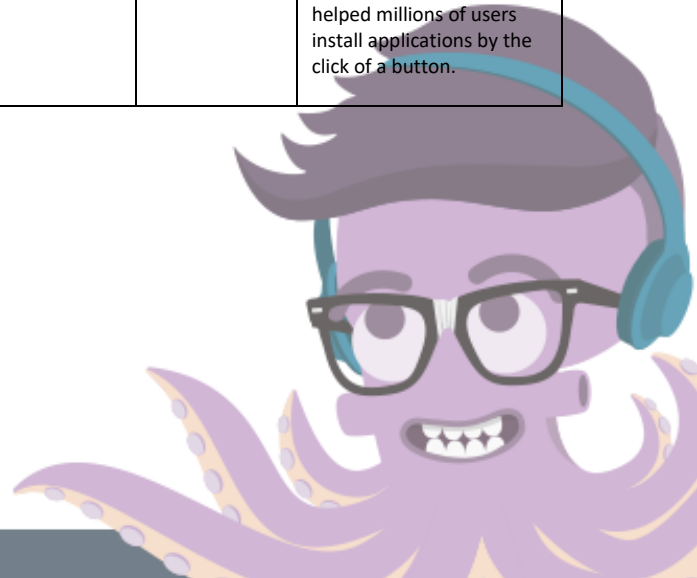

<p><b>Atomicorp</b> Security core complete</p> 	<ul style="list-style-type: none"> <li>• Atomic Secured for Linux is complete security for your server. It protects from thousands of risks and vulnerabilities automatically, including:             <ul style="list-style-type: none"> <li>• Zero Days</li> <li>• Web Attacks</li> <li>• Denial of Service</li> <li>• WebShells and Malware</li> <li>• Brute Force Attacks</li> <li>• and More!</li> </ul> </li> </ul>	<p>Security: Mod security</p>	<p>Retail: \$ 10.00</p>	<p>Security core with core ModSecurity rules. Unlike other security solutions that only protect your server from known risks, our unique solution provides proactive security by immunizing the entire system against whole classes of vulnerabilities and protecting it from the firewall to your applications, and all the way down to the kernel. Our security products are the result of years of extensive research and were designed to address the crucial cyber security concerns that our clients face on the daily basis.</p>
<p><b>Kaspersky</b> Antivirus</p> 	<ul style="list-style-type: none"> <li>• Premium antivirus by Kaspersky</li> </ul>	<p>Security: Email Antispam</p>	<p>Retail: Dedicated \$ 29.99 VPS \$ 7.49</p>	<p>Words-fastest antivirus updates Unlimited Mailboxes, zero touch</p>
<p><b>Datagrid</b></p> 	<ul style="list-style-type: none"> <li>• Vulnerability &amp; Reliability Scanner Pro</li> <li>• 2 versions, free and Pro</li> <li>• <b>Free:</b> Datagrid VCTR analyzes your server configuration and compares it to real world results from servers around the world to report reliability and security vulnerabilities.</li> <li>• <b>Pro:</b> Datagrid VCTR pro allows you to automatically or manually select and fix vulnerabilities, and includes dashboard and email notifications. Compatible with Ubuntu, Debian, CentOS and RedHat distros.</li> <li>• Details: <a href="https://www.plesk.com/extensions/vctr-by-datagrid/">https://www.plesk.com/extensions/vctr-by-datagrid/</a></li> </ul>	<p>Security: fix vulnerabilities</p>	<p>Pro plan Retail: \$ 9.99</p>	<p>New software vulnerabilities are identified every day. If you're running numerous servers, virtual machines and containers how do you continuously track which systems have new vulnerabilities, and which have available updates. VCTR scans configurations and rapidly identifies vulnerabilities.</p>
<p><b>ReadyKernel by Virtuozzo</b></p> <p>NEW</p> 	<ul style="list-style-type: none"> <li>• Rebootless update with zero downtime</li> <li>• Live patching based on kpatch upstream technology</li> <li>• Proactive notifications for new patches</li> <li>• Rollback ability</li> <li>• Automatic updates</li> <li>• Online portal for supported kernels and patches</li> <li>• 24 x 7 Support</li> </ul>	<p>Security: Server</p>	<p>Retail: \$ 5.00</p>	<p>Keep your customers protected against outside threats and vulnerabilities with instant security patches that keep servers up and running and secure.</p>

<p><b>Soshlr</b></p> <p><b>NEW</b></p> 	<ul style="list-style-type: none"> <li>• Social media management</li> <li>• Manage social media assets at scale, with alignment to their structure</li> <li>• Offering 4 different plans, Solo, Starter, Advanced, Master</li> <li>• Details: <a href="https://www.plesk.com/extensions/soshlr/">https://www.plesk.com/extensions/soshlr/</a></li> </ul>	<p>Marketing: Social media management</p>	<p>Solo RRP \$ 4.99</p> <p>Starter RRP \$ 9.99</p> <p>Advanced RRP \$ 19.99</p> <p>Master RRP 49.99</p>	<p>Offer your customers an easy to use social media management solution. Soshlr gives businesses greater control to coordinate brand management and marketing inside Facebook, Twitter, LinkedIn and Instagram – from a single dashboard.</p>
<p><b>Web Presence Builder</b></p> 	<ul style="list-style-type: none"> <li>• Simple website builder tool</li> <li>• 4 plans: 10 sites, 30 sites, 100 sites, 1000 sites</li> </ul>	<p>Websitebuilder CMS</p>	<p>10 sites RRP \$ 0.99</p> <p>30 sites RRP \$ 2.99</p> <p>100 sites RRP \$ 9.99</p> <p>1000 sites RRP 19.99</p>	<p>Web Presence Builder is an easy and intuitive means of creating websites for small businesses and individuals.</p>
